GridMind Live Paper Test

Daily Report: Delivery Day Monday, November 9, 2026

Day 15 of 15 | Written November 8, 2026 at 2:31 PM | Ledger intact

Public version: the ENTSO-E day-ahead prices are left out because their license does not allow redistribution.

1. Summary of the Day

On Monday, November 9, 2026, the best result came from the MILP agent with the 7-day average forecast, which earned €1,028.22. That is about 92% of what a trader with perfect foresight could have made (€1,122.74), so roughly 8% of the possible profit was left on the table. Encouragingly, none of the agents lost money, and every trading agent beat simply doing nothing. Looking at the whole test so far, the MILP agent that plans on yesterday's prices is in the lead with €4,666.30 in total, or €311.09 per day on average.

Table 1. Profit by agent in EUR on November 9, 2026 and since the test began on October 26, 2026

Agent	Day	Total	Per day	% of bound	Days	Losses
Perfect foresight (bound)	1,122.74	7,918.83	527.92	100.0	15	0
MILP, 7-day average	1,028.22	3,167.79	351.98	64.5	9	0
MILP, LEAR forecast	983.70	3,168.81	352.09	64.5	9	0
PPO seed 11, LEAR	974.33	3,167.21	351.91	64.5	9	0
MILP, yesterday's prices	955.89	4,666.30	311.09	58.9	15	1
Threshold rule, LEAR	678.73	2,194.33	243.81	44.7	9	0
PPO seed 33, LEAR	646.46	2,475.11	275.01	50.4	9	0
PPO seed 44, LEAR	591.88	2,249.19	249.91	45.8	9	0
PPO seed 55, LEAR	429.04	2,103.24	233.69	42.8	9	0
PPO seed 22, LEAR	370.70	2,047.97	227.55	41.7	9	0
Do nothing	0.00	0.00	0.00	0.0	15	0

2. Status of the Test

The hash chain of the ledger is intact (267 entries), which means that none of the earlier entries has been changed since it was written. The schedules for November 10, 2026 have not been fixed yet; they are due before noon (Warsaw time) on November 9, 2026. This was day 15 of the planned 15-day test. The planned test period is now complete.

3. Figures

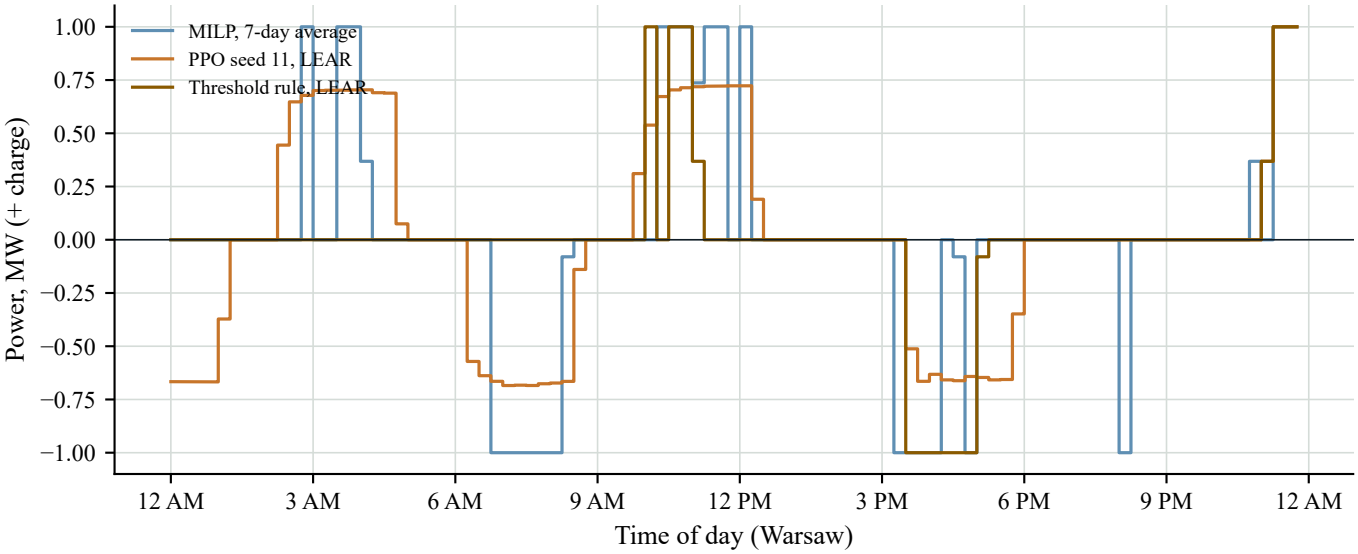

Figure 1. Schedules of 3 agents, fixed before the gate for November 9, 2026

Source: own study based on ENTSO-E Transparency Platform 12.1.D

Note: This is a paper-trading test. Each schedule is locked in before the noon deadline on the previous day and then scored against the published day-ahead prices; no order is ever sent to the market. Profits already include a wear cost of €10 per MWh charged or discharged, and the battery is rated at 1 MW / 2 MWh.
